## SCOPE

Practicing orthopaedic surgeons must periodically update their knowledge according to the most recent clinical research. In addition, reviewing, analyzing, and discussing evidence-based practices, emerging practice trends and patient outcomes provides an opportunity to raise the overall surgeon competence in hip and knee condition management. This meeting is intended to equip practicing orthopaedic surgeons with state-of-the art information and cutting-edge strategies to enhance overall surgeon competence related to the care of patients with arthritis and degenerative disease. It combines general and breakout sessions, emphasizing case-based learning in a small group setting for the most effective results.

## OBJECTIVES

The objectives below will be presented to learners by AAHKS and have been framed in terms of physician change or health status improvement, in keeping with our CME mission.

- Analyze total hip and knee arthroplasty cases
- Investigate the patterns contributing to effective total hip and knee primary arthroplasty and revision
- Determine the strategies contributing to optimal perioperative and postoperative care, including complication management

## ACCREDITATION AND CME CREDIT

The American Association of Hip and Knee Surgeons (AAHKS) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

The American Association of Hip and Knee Surgeons (AAHKS) designates this live activity for a maximum of *15.5 AMA PRA Category 1 Credits™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

## DISCLOSURES

Many healthcare professionals have financial relationships with ineligible companies. These relationships must not be allowed to influence accredited continuing education. AAHKS is responsible for identifying relevant financial relationships between individuals in control of educational content and ineligible companies and managing these to ensure they do not introduce commercial bias into the education. Financial relationships of any dollar amount are defined as relevant if the educational content is related to the business lines or products of the ineligible company.

**Definition of ineligible company:** Those companies, whose primary business is producing, marketing, selling, re-selling, or distributing healthcare products used by or on patients. Examples of such organizations include:

- Advertising, marketing, or communication firms whose clients are ineligible companies
- Bio-medical startups that have begun a governmental regulatory approval process
- Compounding pharmacies that manufacture proprietary compounds
- Device manufacturers or distributors
- Diagnostic labs that sell proprietary products
- Growers, distributors, manufacturers or sellers of medical foods and dietary supplements
- Manufacturers of health-related wearable products
- Pharmaceutical companies or distributors
- Pharmacy benefit managers
- Reagent manufacturers or sellers

**NOTE:** Relevant financial relationships have been mitigated.

Disclosure information for all planners, presenters, faculty, and other contributors can be found on the AAHKS website ([www.AAHKS.org/AAHKS-Spring-Meeting](http://www.AAHKS.org/AAHKS-Spring-Meeting)) or **Mobile App**.
